# **CASE STUDY**

# EPM solutions for the Global Food Product Distributor

### **About Client**

The client is a leading global distributor of food products to various industries such as restaurants, healthcare facilities, educational institutions, and lodging establishments. With a sales and service network of around 425,000 customers, they are dedicated to supporting their success in the food service sector and satisfying the appetites of consumers. Operating from 194 locations across the U.S., Bahamas, Canada, UK, and Europe, they offer a wide variety of products. As a Fortune 100 company, the company reported approximately \$69 billion in revenue and around \$1.7 billion in net earnings in 2022.

#### **Executive Overview**

Techwave first worked with the client in 2008 on a small Business Intelligence (BI) and Enterprise Performance Management (EPM) project. However, our relationship has since grown into a trusted and valuable partnership. Our approach, which puts the customer first, combined with our extensive technical and functional expertise, has allowed us to become Sysco's strategic IT partner.

We have worked with client to design and implement solutions for a variety of EPM processes, including data integration, financial consolidation, planning, forecasting, and reporting. Throughout this partnership, we have implemented, upgraded, migrated, and provided support for numerous versions of various software programs, such as SAP BPC, BW, BODS, Informatica, MuleSoft, SSIS, and SSAS.
