

Techwave

Techwave established in 2004, is a global end-to-end IT services & solutions company, which develops long-term relationship with clients by leveraging unique delivery models and expert frameworks.

Leveraging SAP CarveOut Solution for the Mega Acquisition of Global Tech Distributor

About Client

The client is a global technology distributor of category-leading unified communications, network infrastructure, data center, and security solutions with a worldwide network of specialty resellers with a footprint of more than 70 countries. They combine industry insight and technical expertise to be the catalyst for vendor and partner success with more than US\$ 3 billion annual revenue and 30+ years of experience.

Executive Overview

Techwave started working with the client for SAP Carve out projects on Jan. 2022 and pinnacle the task in July 2022. The landscape for the client's Archiving and Carve out project includes putting together the acquiring company's data from its ECC instance and reducing the size of its current database.

Broadly, the work scope covers SAP support for:

A separate carve-out instance of ECC for the acquiring company-only data with read-only access to the display functions

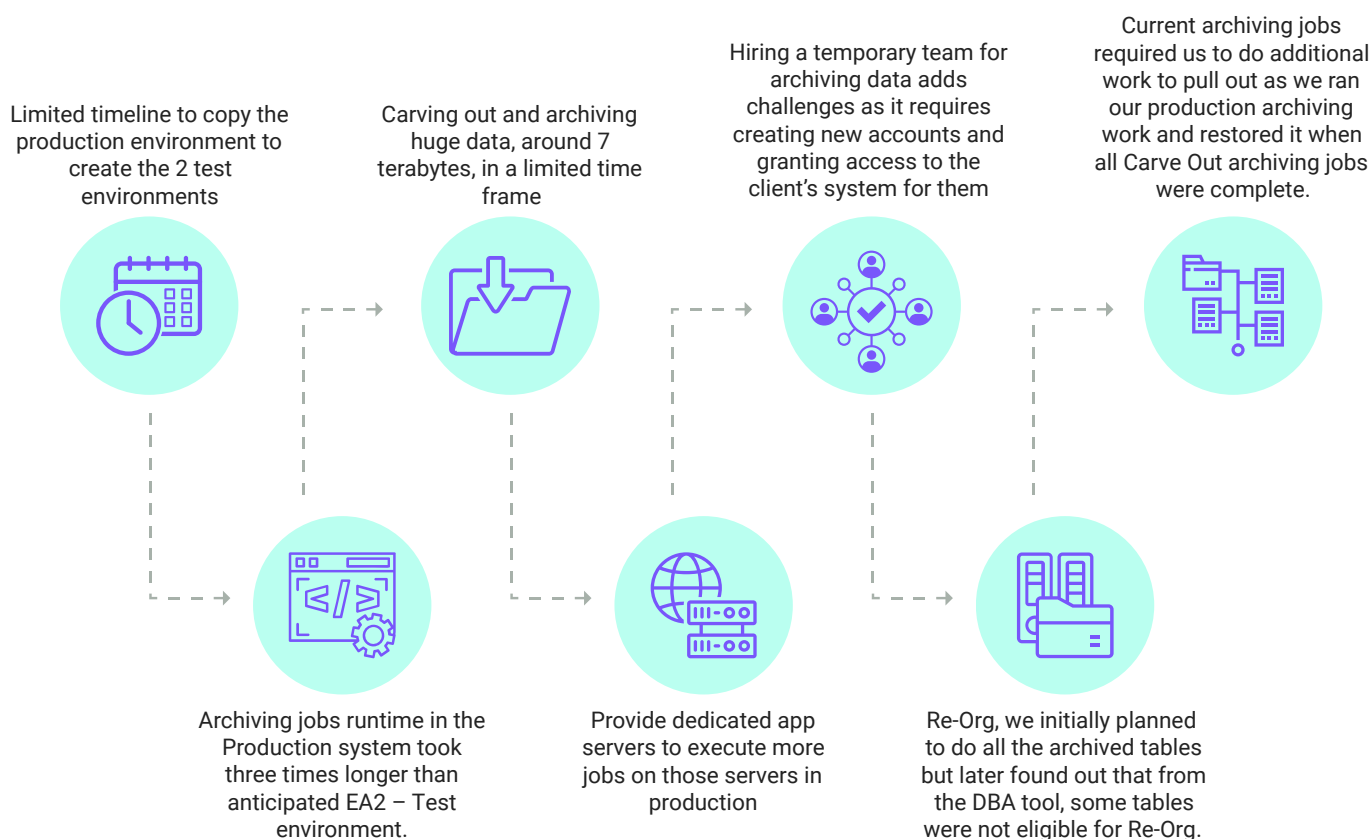

Optimized and reduced-size database on the ECC platform for the remaining client's business

Client's Challenges

The client needed an experienced SAP technology partner to lead a critical role in carving out data from their original system and provide the same to the acquiring company with limited access. Here is the list of activities performed by the Techwave team to meet client's expectation:

Techwave's Strategy and Solutions

The Techwave team has simplified some processes for archiving and carving out the acquiring company's data from the client's system by segregating the process into two phases and adopting the following strategies and solutions:

The step starts with creating a project copy of the client's current ECC platform.

Phase 1,

Carve out client's data from a new instance with archive/purge reorg process

Provide read-only access to the acquiring company

Test carved-out data

Phase 2,

After creating the acquiring company instance is validated, archive its data from the client's ECC platform.

Perform testing cycles.

Re-organize the database to save disk space from arriving at the client's optimized instance.

Business Impact

Techwave experts-built efficiency supported the acquisition and handover of the required data to the acquiring company. Here are some value-added contributions by Techwave:

Data carve-out completed in less than 6-months' period

The acquiring company's production system is completed and shared for read-only purposes

The acquiring company's data archive completed from the Westcon system

Data archiving results in more space for future use transactional growth for the client

Database Re-Org completed in EA2 Test environment

Why Choose Techwave?

As reflected in the solutions above, Techwave has provided expertise in niche areas for the client's third-party applications and innovative solutions to address business-specific needs and build efficiency. This resulted in productivity gains and optimal use of implemented business applications. We invest in our colleagues and recruit from leading schools and colleges so that our team has the experience, drive, and skills to deliver.

We work with leading global software vendors and Business Process management providers for your confidence and convenience. Also, Techwave is a pioneer in new and upcoming SAP and cloud applications like SAP CX/SAP SAC that simplifies e-commerce for businesses, buyers, and sellers. Our expertise in digital solutions means our services, technologies, and platforms are ready for today's challenges and future-proofed so that you can take advantage of tomorrow's opportunities. Our high standard of professional service and support back up our services.

Techwave strives to earn customers' trust daily with its skills and experience, delivering real value at every opportunity.
