

BRIDGING THE FUTURE WITH FTTx SOLUTIONS IN THE UK & IRELAND

Established in 2004, Techwave, is dedicated to providing **cutting-edge FTTx deployments** and comprehensive **digital transformations** for telecom leaders globally. Our services include Field Surveys, Plan & Design, Application Development, Analytics, and IoT, aimed at empowering businesses in the UK and Ireland for sustained growth and resilience in today's rapidly changing digital landscape.

19 Years
of Global Engineering
and Digital
Transformation

11
countries
5
continents

4000+
employees
globally

1000+
Engineers
and
Technicians

ENGINEERING PORTFOLIO

Plan & Design:
Visualize the future
with build drawings.

As-built Records/GIS Data:
Update databases and
inventory tools.

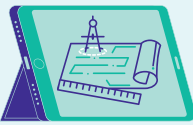

Field Services:
Infrastructure scope, survey, capture, and audit.

TRANSFORMING TELECOM SURVEYS: TECHWAVE'S MDU SURVEY APP

The **innovative MDU Survey App**, is a one-stop solution designed to redefine the way **telecommunication surveys** are conducted for Multi-Dwelling Units (MDUs).

Our app, tailored for android tablets, enables surveyors to seamlessly capture images of the MDU's interiors and exteriors, pinpointing the ideal connection points from the street to the apartment.

As surveyors navigate through the building's interiors, they can efficiently map the best pathways for fibre installations, annotate images with cable routes and crucial notes, and also relay this information to operators via the cloud.

Captures MDU interiors and exteriors seamlessly on Android tablets

Maps the best pathways for internal fibre installations

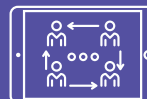

Integrates detailed cable routing blueprints during photo capture

Ensures policy compliance by operators via Risk Assessment and Method Statement (RAMS)

Bridges the gap between on-field surveys and execution teams

Offers precision in telecom surveys with custom site layouts for engineers
